

Diameter Adaptors Allow You to Handle Smaller Drums with the Same Drum Handler

Model 55/30-16

Diameter Adaptors for smaller drums from 14" to 17.5" in diameter are equipped with adjustable hold-down brackets to prevent your drum from slipping lengthways through the drum holder. Handle a drum up to 38" tall.

Model 55/30-19

Diameter Adaptors for drums from 18.5" to 22" in diameter do not have hold-down brackets. They fit between the ribs of a steel drum. For plastic or fiber drum, use Diameter Adaptor in combination with the Bracket Assembly to prevent the drum from slipping lengthways through the drum holder.

Insert into Drum Holder

Diameter Adaptors are easily inserted into drum holder in just a few seconds. With the hooks slightly above the drum holder, advance it into the drum holder and tilt the Diameter Adaptor downward so that as the hooks engage the top of the drum holder band, it settles into place with its lower tabs protruding below the band. Your drum handler is now ready to handle the smaller drum size.

Handle Smaller Drum

Kontrol-Karrier with Model 55/30-16

Insert the correct size Diameter Adaptor to handle your smaller drum. Diameter Adaptors are available for sizes from 14" to 22" diameter. They are available to fit below-hook Kontrol-Karriers, as shown here, Forklift-Karriers, Hydra-Lift Karriers, and Vertical-Lift Drum Pourers.

Model 55/30-19GR

Diameter Adaptor for 30-gallon steel drum with 19" diameter fits only 3-Piece Drum Holder or drum holder with load binders (185G Series, 285G Series, 185GR Series, 285GR Series, and 300 Series).

Forklift-Karrier with 55/30-16

Use One Drum Handler for Various Size Drums by Inserting the Correct Diameter Adaptor for Each

These handy accessories allow your Morse drum handler to handle various smaller drums. Simply and quickly place the correct size Diameter Adaptor into the drum holder to reduce the grip diameter to match drums smaller than a standard 22.5" diameter 55-gallon steel drum. When you complete dispensing from your smaller drum, simply lift the Diameter Adaptor out of the drum holder to return to handling a 55-gallon drum.

Diameter Adaptors for 17.5" diameter and smaller drums have brackets at top and bottom of the drum. They adjust to securely hold a drum up to 38" tall.

Spark resistant and stainless steel Diameter Adaptors are available for the same diameter ranges.

Note About Drums with Ribs: Because it is recommended that drums be held at their middle, proper size Diameter Adaptor should be used only on a drum with a band at least 8" wide between the ribs.

Diameter Adaptors are made in 1.5" increments of diameter to match common drum sizes. Custom drum adaptors for sizes not shown may be built on special order. Please call with special requirements.
